Counseling: Theory and Practice, Joseph Francis Perez 1995

The Theory and Practice of Vocational Guidance-Bartie Hopson 2014-04-28 The Theory and Practice of Vocational Guidance: A Selection of Readings is a compilation of papers that discusses theoretical foundations and practical applications of vocational guidance. The book presents 16 articles that cover various aspects of counseling, both in theory and in practice. The first part of the text deals with theoretical concerns in vocational counseling, and the second part is devoted to the practical applications of vocational counseling. The book is useful for students who are interested in vocational development, young workers in their first jobs, and the criteria of vocational success. In the next part, the book introduces the practical issues, which include needed counselor competencies in vocational aspects of counseling and an occupational classification for use in vocational guidance: psycho-social aspects of work; and key concepts in the use of psychological tests in vocational guidance. The book will be of great use to any professional who will be most useful in career counseling, such as human resources practitioners, school counselors, and college career advisors.

the historical background to such work, the types of settings in which individuals work and the allied professions that they will encounter. Following on from this, the second section introduces the psychology of adolescence and provides an overview of the research into youth counselling. Finally, the third section considers more applied issues. Initially the infrastructure of counselling services is discussed before moving on to reflect upon pluralistic therapeutic practice. To end, the ways in which outcomes may be assessed in such work are described. In covering such a wide territory this text acts as an essential resource to practicing counselling psychologists and other mental health professionals. It provides a foundation to the work that individuals are undertaking in this arena and advocates that individuals enter into therapeutic work in a critically informed way. At the heart of such considerations is the need to utilise psychological theory alongside research findings to inform therapeutic decision making.
